Your medical history

Before taking Avmapki Fakzynja Co-Pack, tell your healthcare provider about all of your medical conditions, including if you have a history of eye or vision problems, have had severe skin reactions, or have liver problems.

Detail all of your medical conditions here:

Your pregnancy status and plans

Before taking Avmapki Fakzynja Co-Pack, tell your healthcare provider about all of your medical conditions, including if you are pregnant or plan to become pregnant. Avmapki Fakzynja Co-Pack can harm your unborn baby.

Females who are able to become pregnant:

- Your healthcare provider should do a pregnancy test before you start treatment with Avmapki Fakzynja Co-Pack.
- You should use effective birth control (contraception) during treatment and for 1 month after the last dose of Avmapki Fakzynja Co-Pack.
- Tell your healthcare provider right away if you become pregnant or think you may be pregnant during treatment with Avmapki Fakzynja Co-Pack.

Males with a female partner who is able to become pregnant:

- You should use effective birth control (contraception) during treatment and for 4 months after the last dose of Avmapki Fakzynja Co-Pack.
- If you are breastfeeding or plan to breastfeed. It is not known if Avmapki Fakzynja Co-Pack passes into your breast milk. Do not breastfeed during treatment and for 2 weeks after the last dose of Avmapki Fakzynja Co-Pack.

Detail all of your questions and concerns about pregnancy here:

IMPORTANT SAFETY INFORMATION (CONT'D)

Avmapki Fakzynja Co-Pack may cause fertility problems in females and males, which may affect your ability to have children. Talk to your healthcare provider if this is a concern for you.

Please see additional Important Safety Information throughout this brochure and discuss with your healthcare provider.

About the medications you take

Avmapki Fakzynja Co-Pack may affect the way other medicines work, and other medicines may affect how Avmapki Fakzynja Co-Pack works. It's important to tell your healthcare provider about all the medicines you take, including prescription and over-the-counter medicines, vitamins, and herbal supplements.

Especially tell your healthcare provider if you take:

- ☐ Proton pump inhibitors (PPIs), such as omeprazole, pantoprazole, etc.
- ☐ H2 receptor antagonists (H2 blockers), such as cimetidine, ranitidine, etc.
- ☐ A blood thinner called warfarin

Check the applicable boxes above and list all medications you take below, including prescription and over-the-counter medicines, vitamins, and herbal supplements:

_____ _____ _____

_____ _____ _____

_____ _____ _____

Avmapki Fakzynja Co-Pack may cause serious side effects, including eye problems, severe skin reactions, liver problems, and muscle problems (rhabdomyolysis).

Use the following sections to track and monitor all side effects you experience during treatment.

Monitoring your eye health

Eye problems are common with Avmapki Fakzynja Co-Pack and can be severe. Your healthcare provider will send you to see an eye care professional before starting treatment, during treatment, and for any new or worsening eye problems. Tell your healthcare provider if you get any new or worsening eye problems including:

- Changes in vision, such as blurred vision, double vision, or vision loss
- Dry eye(s)
- Eye and eyelid inflammation, including redness, swelling, and itching
- Eye pain
- New or increased floaters (small dark spots or squiggly lines that float across your vision)
- Light hurting eyes or seeing flashes of light

Watch the eye safety video

Notes:

Monitoring your skin health

Skin reactions are common with Avmapki Fakzynja Co-Pack and can be severe or life threatening. Tell your healthcare provider if you develop any new or worsening skin reactions including:

- Skin rash or acne
- Dry skin
- Itching
- Blisters on your skin
- Redness or swelling of your face, hands, or soles of your feet
- Blisters or sores in your mouth
- Peeling of your skin
- Skin infection

Watch the skin safety video

Notes:

Monitoring your liver health

Liver problems are common with Avmapki Fakzynja Co-Pack and can be severe. Treatment with Avmapki Fakzynja Co-Pack can increase the level of aspartate aminotransferase, alanine aminotransferase, and bilirubin in your blood. Your healthcare provider will do blood tests before starting each treatment cycle and during treatment to check your liver function. Tell your healthcare provider if you get any signs and symptoms of severe liver problems including:

- Yellowing of your skin or the white part of your eyes
- Itchy skin
- Feeling very tired
- Flu-like symptoms
- Nausea or vomiting
- Upper right side stomach pain
- Dark or tea colored urine
- Bleeding or bruising more easily than normal

Notes:

Monitoring your muscle health

Avmapki Fakzynja Co-Pack may cause muscle problems (rhabdomyolysis) that can be severe. Treatment with Avmapki Fakzynja Co-Pack can increase the level of an enzyme in your blood called creatine phosphokinase (CPK) and can be a sign of muscle damage. Your healthcare provider will perform blood tests to check your levels of CPK before starting each treatment cycle and during treatment. Tell your healthcare provider if you get any signs or symptoms of increased CPK including:

- Weakness or difficulty moving arms and legs
- Muscle or bone aches or pain that does not go away
- Dark, red colored urine
- Decreased urine output

Notes:

Monitoring your overall health

It's important that you tell your healthcare provider about any problems or discomfort that you may be experiencing during treatment.

Indicates side effect determined by labwork

The most common side effects of Avmapki Fakzynja Co-Pack include:

- Nausea
- Tiredness
- Increased aspartate aminotransferase
- Diarrhea
- Swelling in the body (edema)
- Decreased hemoglobin
- Increased alanine aminotransferase
- Vomiting
- Increased blood bilirubin
- Increased triglycerides
- Stomach-area pain
- Acid reflux
- Increased alkaline phosphatase
- Decreased platelets
- Constipation
- Shortness of breath
- Cough
- Urinary tract infection
- Decreased lymphocytes
- Decreased neutrophils
- Proteinuria

Notes:

Tell your healthcare provider if you are experiencing gastrointestinal side effects such as nausea, diarrhea, vomiting, stomach-area pain, acid reflux, or constipation, and detail your symptoms here:

If you are experiencing swelling in the body, also called edema, please detail your symptoms here:

IMPORTANT SAFETY INFORMATION (CONT'D)

Tell your healthcare provider if you have any side effect that bothers you or that does not go away.

These are not all of the possible side effects of Avmapki Fakzynja Co-Pack. Call your doctor for medical advice about side effects.

Please see additional Important Safety Information throughout this brochure and discuss with your healthcare provider.

How should I take Avmapki Fakzynja Co-Pack?

Avmapki:

- On **Weeks 1, 2, and 3**, take 3.2 mg (4 capsules) on **Day 1** and **Day 4**
- On **Week 4**, take a one-week break
- Take each dose at the same time **with food**
- Swallow capsules whole. Do not chew, break or open the capsules
- **Keep refrigerated** in original bottle

3.2 mg (4 capsules)

1 DOSE

- On **Week 4**, take a one-week break
- Take **with food**
- Swallow tablets whole. Do not chew, break or crush the tablets
- **Keep refrigerated** in original bottle

200 mg (1 tablet)

1 DOSE

Product images shown are not actual size.

Use the table below for monthly treatment guidance.

Avmapki | **Fakzynja**

	Time	Day 1	Day 2	Day 3	Day 4	Day 5	Day 6	Day 7
Weeks 1, 2, & 3	Morning Same Time							
	Evening							
Week 4	ONE-WEEK BREAK. Do not take Avmapki Fakzynja Co-Pack during Week 4.							

TAKE Avmapki Fakzynja Co-Pack exactly as directed by your healthcare provider.

DO NOT change your dose or stop taking Avmapki Fakzynja Co-Pack without talking to your healthcare provider.

IF YOU VOMIT after taking Avmapki capsules or Fakzynja tablets, do not take an additional dose. Take the next scheduled dose as prescribed by your healthcare provider.

IF YOU MISS A DOSE of Avmapki by more than 24 hours or if you miss a dose of Fakzynja by more than 6 hours, skip the missed dose and take the next scheduled dose as prescribed by your healthcare provider. Do not take two doses at the same time to make up for a missed dose.

DISCARD any remaining medication at the end of the 3-week treatment period as instructed by your healthcare provider.

IF YOU DEVELOP CERTAIN SIDE EFFECTS, your healthcare provider may change your dose, temporarily stop, or completely stop your treatment with Avmapki Fakzynja Co-Pack.

IF YOU TAKE ANTACIDS, take Fakzynja tablets 2 hours before or 2 hours after taking the antacid.

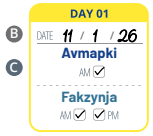
Dosing and side effects tracker

Use the calendar below to track your treatment and note when side effects occur.

How to use the calendar

- Ⓐ Note the cycle number and date when your new treatment begins.
- Ⓑ Write in the date you take your medication.
- Ⓒ Check the box each time you take your medication.
- Ⓓ Record any side effect you experience on each day.

Ⓐ **Cycle #** 3 **Start date** 11 / 1 / 26



Ⓓ Side effects: Blurred vision

After noting the side effect on the calendar here, please put the details of each side effect in its respective section of the tracker on the prior pages.
